#### Citizen Developer Spotlight: Heather Bryant

When Heather Bryant joined Sodexo in 2009, her  
Web development experience involved working  
with Filmmaker and Salesforce. She was unfamiliar  
with QuickBase as a platform. Six years later, Bryant  
has built the Site Management System used by all  
locations as well as dozens of client solutions on the  
QuickBase Platform and she's a sought-after resource  
for teams across Sodexo. Developer growth like this  
speaks to the power of real citizen development.

"When Heather started, we only had one QuickBase  
app. She took that app to the next level and created  
a career out of it," says Bruce Squibb, Senior  
Director of Program Development at Sodexo.

To get up to speed on QuickBase app  
building, Bryant utilized QuickBase's  
robust learning resources. She

invested her time in free training webinars,  
online tutorials and reading the QuickBase  
Help websites, as well as working with the

Caspio is the world's leading low-code application platform. Business professionals are empowered to create forms, searchable databases, interactive  
reports, and sophisticated multi-user business applications. The all-in-one platform includes a built-in online database, rapid application development  
tools, and scalable cloud infrastructure. Coupled with world-class support, Caspio customers get free themselves from complex programming tools and  
long project backlogs using a solution proven to reduce costs and time-to-market by a factor of 10.  
The platform powers applications for thousands of customers, ranging from global corporations and government agencies to universities,  
nonprofits, and small businesses around the world.
